The HERMES language for work session specification

- Marazakis, M.; Papadakis, D.; Nikolaou, C.
Editor(s): Tjoa, A.M., Wagner, R.R.
Dept. of Comput. Sci., Crete Univ., Heraklion, Greece

Abstract:
The paper presents the HERMES specification language, which is introduced
scripts for complex activities involving coordination and collaboration. The I
part of a framework for network-centric applications, providing a two-level
expressing metadata. Service flow rules define communication channels bet
components and actions triggered by run time events. The semantics of HEI
a model for dynamic and adaptive work sessions in open environments.

Index Terms:
specification languages; work session specification; HERMES specification la
scripts; complex activities; coordination; collaboration; network-centric app
two-level framework; metadata; service flow rules; communication channel
components; run time events; adaptive work sessions; open environments
